Becoming a mature, data-driven organization

1. Nascent
   - A big data analytics environment with a low awareness of Big Data value
   - Milestones to achieve
   - Gain leadership sponsorship
   - Establishing the big data vision
   - How to get there
   - Enlist executive support
   - Identify a project champion
   - Identify your needs and challenges

2. Pre-adoption
   - More awareness to new technology supporting big data analytics
   - Milestones to achieve
   - Prepare the organization for big data
   - How to get there
   - Develop an education and awareness program
   - Build an executive sponsor team
   - Establish a big data governance council

3. Early adoption
   - A fast-paced environment with commitments to big data adoption
   - Milestones to achieve
   - Building a foundation critical for the analytics journey
   - How to get there
   - Implement a big data strategy
   - Develop a roadmap
   - Establish a big data governance council

4. Corporate adoption
   - IT and business teams collaborating to determine the right big data business problems to solve
   - Milestones to achieve
   - Cross the chasm
   - How to get there
   - Establish a big data governance council
   - Develop a roadmap
   - Implement a big data strategy

5. Mature/Visionary
   - Organizations demonstrating the value of big data analytics
   - Milestones to achieve
   - Get the right big data governance
   - How to get there
   - Establish an effective data governance model
   - Integrate scattered and siloed data

Getting from one stage to the next with big data analytics consulting services
